Request for Proposals

Feral Pig Management

BACKGROUND & SCOPE OF WORK

PURPOSE OF REQUEST FOR PROPOSALS

The Santa Clara Valley Open Space Authority (Authority) is soliciting proposals from qualified consultants with expertise in feral pig management to provide the Authority with pig trapping services in areas where Authority staff recognize high pig activity and damage from pigs throughout lands which the Authority manages.

BACKGROUND

The Authority is an independent special district created on February 1, 1993, by an act of the Legislature and is governed by a seven-member elected board of directors. The Authority serves a large portion of Santa Clara County by protecting sensitive lands, preserving natural communities, and managing open space. The Authority has preserved over 30,000 acres, which include four preserves with over 26 miles of trail. Activities on the preserves include hiking, cycling, horseback riding, and nature study.

The lands managed by Santa Clara Valley Open Space Authority (Authority) comprise rich and varied ecotypes that are high in biodiversity, provide high-quality habitat for native plants and animals, and areas critical for the movement of wildlife between ranges. These lands also host a wide range of rare and endangered species of plants and animals. These lands are also under threat from invasive plant and animal species, including feral pigs which can damage to critical habitat and sensitive plants. Feral pigs also referred to as wild pigs, include Eurasian wild boar (*Sus scrofa*) introduced to California in the 1920s, their subspecies of domestic pigs (*Sus domesticus*) that were released or escaped captivity in California since the 1700s, and hybrids of these two animals. The California Department of Fish and Wildlife (CDFW) and other regional agencies, including the Authority, have observed that feral pig populations are increasing across Santa Clara County and that actions must be taken to prevent further damage. In early 2024, Authority staff observed damage to fragrant fritillary (*Fritillaria liliacea*), a sensitive species, at one of its preserves, further elevating the need to control feral pig populations.

OBJECTIVES

Specific objectives include:

- Reducing feral pig populations on the Authority's land, and land which it manages on behalf of partners, by trapping, dispatching, and disposing of pigs.
- Reduce damage to resources associated with pigs
- Gather more data on where pig activity is most prevalent, and the size of the pig population within Authority lands and lands managed by the Authority for partners.

SCOPE OF WORK

The Authority seeks to enter into a 3-year contract with a qualified consultant specializing in feral pig management to reduce the feral pig population on lands owned or managed by the Authority. The Authority has selected trapping as its preferred method of pig control in order to effectively remove whole groups of pigs, known as sounders, at once, as per the Authority's Integrated Pest Management (IPM) manual. The Authority seeks the establishment and maintenance of 4 corral style traps in priority locations during the months of March through November, as well as the ability to rapidly respond to increased pig activity as needed with box traps. The consultant, their principal, or their staff, shall have been regularly engaged in the business of providing feral pig control services for at least five years, and shall possess all permits, licenses, and professional credentials necessary to perform services as specified under this RFP. The consultant will obtain any additional take permit or permits from the California Department of Fish and Wildlife (CDFW) needed to conduct feral pig management on Authority managed land until such a time as the Authority obtains a Memorandum of Understanding (MOU) for feral pig control from the CDFW.

Project tasks include but are not limited to:

- The consultant will conduct a feral pig control program within the Authority's jurisdictional boundaries, to include properties the Authority owns and properties that are managed by the Authority on behalf of partner agencies that own the land.
- This program will consist of the installation, maintenance, and operation of no fewer than 4 corral traps, and the ability to respond to pig activity with box traps in an on-call basis.
- Should additional pig activity require urgent attention that is not addressed by the corral traps, the consultant will be available in an on-call capacity. Upon notification of feral pig activity or a sighting by Authority staff, the Consultant will respond within 24 hours to investigate and proceed with any necessary action. Consultant will also, upon request, scout for feral pigs and pig sign to assist Authority personnel in assessing pig damage
- The consultant will develop a plan with Authority staff to select priority areas to employ traps where pig activity has been seen consistently as well as where damage to sensitive species from pig activity has been identified (See Attachment B: Proposed Trap Location). Attachment B represents potential trap locations options proposed by the Authority.
- This pig control program will use baited traps with humane termination. The consultant will pre-bait and locate traps in the areas with the highest pig concentrations based upon

Authority personnel sightings and/or assessment of feral pig damage. The Consultant will dispose of carcasses. All effort will be made to monitor traps using remote monitoring camera equipment: the Authority reserves the right to waive this requirement if it is not feasible in a location it has selected as a priority area for trapping, providing that other monitoring ensures the timely and humane treatment of animals upon capture.

- Special consideration will be taken to ensure trapping and dispatching operations occur away from areas where members of the public may be present to ensure the safety of the public. Because many of the Authority's preserves include recreational uses, considerations will be made to reduce visual and audible disturbance to visitor's experience.
- Consultant will dispose of carcasses at a landfill that allows such disposal or at an appropriate rendering facility. The consultant may request permission to dispose of carcasses on site at the Authority's discretion on a case by case basis.
- Consultant shall notify the appropriate CDFW contact person by 1700 hours on the day of all activities to take wild pigs utilizing lights and/or firearms between sunset and sunrise.
- Consultant will be responsible for providing all necessary equipment, material, and supplies to perform the feral pig control work. Materials, supplies and equipment include, but are not limited to, traps, bait for traps, motor vehicles, ATV's & trailers, tallow facilities fee, firearms, ammunition, and remote monitoring equipment
- Consultant will transport all bait and traps required for the program. The consultant will be responsible for securing a place to store the bait and traps off Authority property, unless a secure on- site storage area is pre- approved by Authority staff in writing.
- Consultant will maintain records of the amount of effort expended (person hours) and the number of wild pigs removed from Authority lands or lands managed by the Authority on behalf of a partner agency and submit a monthly report of these records with the invoice to the Authority. Information to be recorded will include but may not be limited to the following:
 - Date, time and location of kill
 - Method of take
 - Sex of wild pig (male, female, barrow)
 - Coat color
 - Estimated age of pig
 - Reproductive status if female (if pregnant note the number and estimated age of fetuses)
 - Notation of any marks, ear notches, tags
 - Actual or estimated whole body weight and/or dressed carcass weight
 - General body condition (fat reserves, evidence of parasites, disease or wounds)
 - Means of disposal (date, place, name of responsible person, receiving institution)

- Cryptosporidium sampling information (if appropriate) including index # for chain of custody.
- Consultants will ensure that traps are well maintained and that, when activated, traps contain bait/food sufficient to last the period between when pigs become trapped and when the consultant can dispatch the pigs. This is to ensure humane conditions and prevent distress or injury to the pigs prior to dispatching. At no time will pigs be allowed to remain trapped for more than 24 hours before dispatching.
- All ammunition used must be lead-free and comply with all applicable laws and regulations regarding ammunition used for hunting game animals.
- Consultant will alert Authority staff when dispatching of animals with enough time to allow Authority staff to ensure measures are taken to keep the public away from the area and inform their partners that dispatching will be taking place.
- Consultant will be prepared to provide hours reports and invoices separately for lands falling into the following separate ownership situations: 1) Lands owned and managed by the Authority; 2) lands owned and managed by the Authority where a Habitat Agency (HA) easement allows for reimbursement by that agency; 3) Lands owned by Valley Transit Authority (VTA) and managed by the authority; 4) Lands owned by Valley Water (VW) and managed by the Authority; 5) Lands owned by The City of San Jose and managed by the Authority; and 4) lands owned by Peninsula Open Space Trust (POST) and managed by the Authority.

The provisions of this section shall survive the termination or expiration of this Agreement. It is understood that the duty of Contractor to indemnify and hold harmless includes the duty to defend as set forth in section 2778 of the California Civil Code. Acceptance of insurance certificates and endorsements required under this Agreement does not relieve Contractor from liability under this indemnification and hold harmless clause. This indemnification and hold harmless clause shall apply whether or not such insurance policies shall have been determined to be applicable to any of such damages or claims for damages.

Proof of all insurance policies is attached to this Agreement as Exhibits XX-XX.

Contractor shall provide to Authority proof of renewal of each insurance policy at least thirty (30) days prior to the expiration of the insurance policy as long as this Agreement remains in effect.

Contractor certifies that Contractor is aware of the provisions of Section 3700 of the California Labor Code, which requires every employer to be insured against liability

for Workers' Compensation or to undertake self-insurance in accordance with the provisions of that Code. Contractor shall comply with the provisions of Section 3700 of the Labor Code before commencing the performance of the work under this Agreement.

In the event that any coverage required under the Agreement is reduced, limited, or materially affected in any other manner, Contractor shall provide written notice to Authority at Contractor's earliest possible opportunity and in no case later than five days after Contractor is notified of the change in coverage.

In the case of the breach of any provision of this section, Authority may, at Authority's option: (1) take out and maintain, at the expense of Contractor, such types of insurance in the name of Contractor as Authority may deem; (2) order Contractor to stop work under the Agreement until Contractor complies with the insurance requirements required by this Agreement; or (3) terminate this Agreement.

The Contractor shall pay prevailing wages to all persons employed in the performance of any part of the Project and otherwise comply with all associated requirements and obligations, if required by law to do so.

Contractor shall retain copies of payroll records for four years after the audit year in which wages were paid, or until the expiration of all applicable statute of limitations period(s), whichever is later.

Contractor warrants and covenants that Contractor presently has no interest in, nor shall any interest be hereinafter acquired in, any matter which will render the services required under the provisions of this Agreement a violation of any applicable state, local, or federal law. In the event that any conflict of interest should nevertheless hereinafter arise, Contractor shall promptly notify Authority of the existence of such conflict of interest so that Authority may determine whether to terminate this Agreement. Contractor further warrants its compliance with the Political Reform Act (Government Code § 81000 et seq.) respecting this Agreement.

15. Compliance with Laws

In the performance of this Agreement, Contractor shall abide by and conform to any and all applicable laws of the United States and the State of California, and all ordinances, regulations, and policies of Authority and other local agency with jurisdiction. Contractor warrants that all work done under this Agreement will be in compliance with all applicable safety rules, laws, statutes, and practices, including but not limited to Cal/OSHA regulations. If a license, permit, or registration of any kind is required by law of Contractor, its employees, agents, or subcontractors to practice Contractor's profession, Contractor represents and warrants that such license has been obtained, is valid and in good standing, and Contractor shall keep it in effect at all times during the term of this Agreement.

The above remedies are in addition to any other remedies at law or equity Authority may have. Contractor shall pay or reimburse Authority for all of Authority's costs and expenses, incurred in enforcing its rights hereunder.

19. Notices
